If you do run over your monthly allowance we'll simply shape your speed for the rest of the month so you can avoid bill-shock. Alternatively give our support team a call and they'll help you easily jump up to the next plan.

The maximum speeds may exceed capabilities of some hardware or software and in some situations speeds may be similar to ADSL2+ speeds. This can be due to a number of factors such as number of user or connections, the end-users hardware and software and the source and type of content downloaded.
